

# The ultimate deterrent to Drink Driving

- the breath alcohol  
ignition interlock

— L I O N —

The vehicle  
engine will not  
start if the driver's  
alcohol level is  
over a pre-set  
limit

- The Alcolock® Lion DS®-10 has been adopted by UK market leaders.
- It is already a proven deterrent for the 'morning after' drink-driving scenario.
- Individual vehicle readings can be transmitted live to base via internet or mobile technology so in the event of a driver failure a contingency can be implemented quickly.
